2.45GHz Dipole Tag

Specifications

Part#	200232
RF Characteristics	ISM band(no license required),2401-2475 MHz;Passive;RF Backscatter
Read Distance	Nominal 50.8 cm(20 in)*--FCC Part 15 Scanner (36 dBm EIRP)
Write Distance	Nominal 18 cm(7 in)*--FCC Part 15 Scanner (36 dBm EIRP)
Average Read/Write Times(single tag read)	Read Write
	1 word (32 bits) 6 ms 75ms
	Subsequent words (ea.) 3 ms
Memory	Unique Serial Number--64 bits(Locked) User Programmable--960 bits EEPROM
Physical Characteristics	Flexible Substrate Length: 9.02 cm(1.85 in) Width: 1 cm(.4 in) Thickness: .076 cm(.030 in)
Operating Temp	-20 to +75C (-4 to 167F)
Storage Temp	-30 to +90C (-22 to 194F)

*Obstructing metals, other conducting materials and label orientation may significantly affect read and write distance measured using linear polarized antenna.

2.45GHz Slot Tag

Specifications

Part#	200278
RF Characteristics	ISM band(no license required),2401-2475 MHz;Passive;RF Backscatter
Read Distance	Nominal 70 cm(24 in)*--FCC Part 15 Scanner (36 dBm EIRP)
Write Distance	Nominal 20 cm(8 in)*--FCC Part 15 Scanner (36 dBm EIRP)
Average Read/Write Times(single tag read)	Read Write
	1 word (32 bits) 6 ms 75ms
	Subsequent words (ea.) 3 ms
Memory	Unique Serial Number--64 bits(Locked) User Programmable 1960 bits EEPROM
Physical Characteristics	Flexible Substrate Length: 3.80 cm(1.50 in) Width: 3.18 cm(1.25 in) Thickness: .076 cm(.030 in)
Operating Temp	-20 to +75C (-4 to 167F)
Storage Temp	-30 to +90C (-22 to 194F)

*Obstructing metals, other conducting materials and label orientation may significantly affect read and write distance measured using linear polarized antenna.
